

EHMIS Guidance Vision

The EHMIS school counselors, along with all faculty, administration, and staff will foster an environment for our middle school students where all personal interactions and activities are treated as opportunities for student individual growth. Constant and consistent opportunities to identify individual strengths and interests, as they relate to future success, will bring relevance to academic demands in relation to student life goals. A respectful, understanding, and supportive atmosphere will help to enhance all students' habits of learning and their development of healthy relationships.
