

VETERINARY CAREER EXPLORATION PROGRAM

For those interested in Health Sciences, and the care of animals, a career in the Veterinary field might be something you want to explore this year. Those working in this career field as a veterinarian, veterinarian technician, or veterinary assistant, care for the health of animals by diagnosing, treating, and researching medical conditions and diseases of pets, livestock, and other animals. The care of animals is a growing industry, with over \$18 billion dollars spent annually. Job demand in this industry are projected to grow approximately 20% across all industry positions in the next 10 years/industry, so this is an excellent time to explore this potential career!
