

INFORMATION TECHNOLOGY CAREER EXPLORATION PROGRAM

Students interested in a career working with computers, technology, and networks will want to check out this two-part series which will focus on the field of information technology. This program will include a discussion about the IT industry, various educational paths, and career options after completing their studies through a discussion with a panel comprised of several key members working in the IT field. The second session will focus in on specific topics of guided by the interests shared with the program hosts by attendees at part-one with a planned hands-on lab!
